

Basic indoor Camera | HD 720P |
Motion detection | microSD

QN-IPC01

Connects directly to your home Wi-Fi network

2-way communication

HD 720P image quality

SD + Cloud storage (optional)

5V DC USB 1000mAh

Combine in "Flows"

Motion detection

Indoor use

5m clear night view

Specifications

| | |
|------------------------|---|
| Wireless connection | WiFi |
| Frequency range | 2400 - 2484 MHz |
| Communication protocol | TCP/IP,HTTP,DHCP,DNS |
| Wireless encryption | WEP/WPA/WPA2 |
| Radio transmit power | 20 dBm |
| Antenna gain | 3 dBi |
| Power | USB Micro |
| Input voltage | 220 - 240V AC |
| Input voltage | 5V DC 1000mA |
| Lens | 2.6 mm |
| Image chip | 1/3" CMOS |
| Image quality | 70P |
| Megapixel | 1MP |
| Viewing angle | 85° |
| Video format | *.mp4 (H.264) |
| Frame rate | 15 fps - 25fps |
| Used Bandwidth | 32 kbit/s ~ 2 Mbit/s |
| Motion detection | Camera motion detection |
| Night vision | 5m |
| Functions | Motion detection Microphone and speaker Automatic IR-CUT filter |
| Storage | Micro SD 2 ~ 64 Gb (class 6) |
| Cloud storage | Optional |
| App platform | iOS & Android |
| IP rating | IP20 |
| Operating temperature | -20 ~ +45° C |
| Operating humidity | 20% ~ 85% |
| Power consumption | 5W |
| Color | White |
| Dimensions | Ø 70 x 117 mm |
| In the box | 1x camera 1x base Installation material 1x USB cable 1x 5V DC adaptor |

Features

- # Plug & play: Connect to your Wi-Fi network in 3 easy steps without the help of a Gateway or software.
- # HD resolution for clear images
- # Watch what is happening at your front door from anywhere with your "qnect home" application
- # Instant notifications (option to disable motion notification) and two-way audio through built-in speaker and microphone.
- # Take a photo or movie in Full HD yourself and save it via your smartphone
- # Automatically records a video on motion detection (via MicroSD card - not included - or optional cloud storage)
- # Infrared night vision of 5 meters.
- # Can be linked to other "qnect home" products: Allow the "qnect home" lights or plug to switch on when motion is detected.

Commercial

This "qnect home" camera always tells you who is (unnecessarily) in your house, wherever you are. As soon as it detects movement, you will receive a push message on your smartphone. You can then see live images and listen to what's going on, without being at home. This all for just a fraction of your budget. Also have your "qnect home" smart lights or smart sockets switch on when it detects movement. This even increases the level of security or even your comfort.

HD (1280x720 pixels) footage is recorded on MicroSD or optional cloud storage, which gives even more flexibility. You don't need more than your existing stable WiFi network to install and connect your camera. Mount it indoors and you are ready to use. An adhesive pad is included to attach the camera to the walls if desired.

This camera has a viewing angle of 85° and accurate motion detection. The camera will automatically start recording and send a push notification to your smartphone. This way you can see a sharp image in HD via your smartphone of what is going on in or around your house. Thanks to the built-in microphone and speaker, you can even hear what's happening and talk via your smartphone. In addition, the camera is just as powerful at night: the night vision mode has a range of 5 meters.

Combine this outdoor camera and other "qnect home" products together in one app, without the hassle of complicated installations. In this case you can switch on your "qnect home" lamps or smart plug with motion detection, so you can conveniently switch on a floor lamp automatically when there is movement. Handy, right !
