This white wireless doorbell with clean mesh finishing can be installed everywhere within a range of 200m from its push button. The beautiful design and mesh finishing make it suitable for every interior. The 90dB durable speaker makes sure you will clearly hear your visitors, but of course give you the option to reduce the sound level (4 levels). Even completely silence the doorbell for 3 to 9 hours and just turn on the flash notifications, ideal when you do not want to be disturbed for a while. The RGB flash on the front make sure you will not miss a visitor, select which color option you like best. Choose between up to 18 melodies according to your likings. More entry solutions in your home? Just add an extra push button and have the doorbell sound different based on which push button is pressed. Mix and match this doorbell with other Ceezam doorbells or push buttons (up to 6 buttons), to customize your doorbell system. The water resistant push button has the space to add a nametag.
