

FIGAROLL PLUS

FIGAROLL PLUS is a ventilating dry-fix solution for mechanically fixing ridge tiles. The system is a modern alternative to a mortar bedded ridge and creates a discreet finish that is far superior in aesthetics and function. Figaroll Plus is made of highly resistant, high-performance materials and it is the most suitable ventilated ridge for the roofer's needs.

BENEFITS

Ventilation – Breathable felt allows air to escape through the ridge preventing mould and rot of roof structure.

Maintenance – Maintenance-free allows expansion and contraction of roof in varying weather conditions.

Waterproofing - Water resistant and does not allow water to penetrate through the roofs surface.

Time & labour-saving - Easy to use; the no-fuss, no-mess application takes approximately 2.5 hours/10m roof ridge.

Cost-saving - No long-term maintenance required.

Design aesthetics - Neat and clean roof lines

Key Features

TECHNICAL DATA

Width	28 to 32 or 34 to 38 cm
Length	5 m/roll
Extensibility	50%
Ventilation	150 cm ² /ml

THE SYSTEM MECHANICS

- Installation requires a top batten on the ridge line to securely fix the ridge roll and ridge tiles.
- Seals ridge to ridge to give a tried and tested weather-tight seal.
- Provides an exceptionally durable method of securing ridge and hip tiles that ensures high resistance to storm damage.
- Gives a continuous weather-tight ventilation path from the interior roof cavity to the outside.

1. Double ventilation channel and innovative labyrinth system for optimal ventilation and total protection against external elements
2. Side skirting of aluminium, deformable and mouldable up to 50%
3. High adherence through butyl tested strip
4. Protection strip with silicone
5. Reinforcement for nailing
